

Sketch of Recommended Additions

- 1 Clear and friendly **signage** asking cyclists to **dismount** and for guests to place dogs on leashes.
- 2 **ADA compliant gate** with gentle swing closure. Gate can be made by local artisan and should be welcoming and visually porous. (Sketch example shows laser-cut steel gate painted in a muted version of the Santa-Rita-prickly-pear-purple of the existing welcome sign.)
- 3 Small **bike rack**, installed at an angle, as a courtesy for guests and to gently signal that the garden only allows pedestrian traffic.
- 4 Roofed **orientation sign** with a map of the garden, a brief description of the garden, and a blackboard to share timely notes such as which flowers are in bloom, notification about classes and events, etc.
- 5 Tiled concrete **bench** underneath existing velvet ash tree and adjacent to kiosk for visitors to rest and/or wait for their parties.
- 6 Move **spigot** off of primary path and behind plantings.

Current Entrance (2022)

Alternative: Gate Painted Signature Green
